

Desander: Model MD250

Designed to reduce the amount of liquid waste produced during a rotary drilling operation by up to 90%, the MD250 is a robust and reliable desander.

Equipped with 3 electric motors it is quiet and has a high capacity through the hydro cyclones and shaker decks allowing for the treatment and separation of arisings from boreholes up to 600 mm diameter.

The Desander is sometimes called a sand or shale shaker or mud separator.

Technical Data	
Weight	3,750 kg
Width	2,500 mm
Length	5,000 mm
Height	2,700 mm
Nominal Treatment Capacity	250 cu m /hr
Power	41 kw
Inlet / Outlet Connections	150 mm
